

## MPA Delivery Partners Selected for Hudson Tunnel Project, The Most Urgent Infrastructure Project in the U.S.

February 28, 2024

CHANTILLY, Va., Feb. 28, 2024 (GLOBE NEWSWIRE) -- Parsons Corporation (NYSE: PSN), as part of the Mace-Parsons-Arcadis (MPA Delivery Partners) joint venture, announced today that the team has been selected by the Gateway Development Commission (GDC) as the delivery partner for the \$16 billion Hudson Tunnel Project (HTP). Together, the firms will coordinate among all stakeholders, contractors, and consultants to ensure that the project satisfies GDC's requirements.

The Hudson Tunnel Project will improve capacity, reliability, and resiliency of commuter and intercity rail transit on the busiest section of the Northeast Corridor, which serves 800,000 daily passengers from Washington, D.C. to New York, New Jersey, and New England. A milestone project supported by the bipartisan Infrastructure Investment and Jobs Act (IIJA), the project is slated to receive nearly \$12 billion in federal funding, the largest investment in a mass transit project in modern history.

"The Hudson Tunnel Project is a critical, once-in-a-generation effort that will embody the excellence of our nation's future infrastructure," said Mark Fialkowski, president, North America Infrastructure for Parsons. "We look forward to partnering with the Gateway Development Commission on unlocking the full economic and societal potential of the Hudson Tunnel Project. As Parsons has done for 80 years, we're ready to continue imagining and delivering the future of transportation in New York and New Jersey."

Mace Group Deputy Chief Executive Officer, Jason Millett said, "We are honored to have been appointed by the GDC to play such a key a role on this historic program. We're inspired by their vision to revolutionize the rail transit experience for passengers on the Northeast Corridor, creating opportunities that will positively transform people's lives. From our experience bringing complex megaprojects to life around the world, we know the delivery partner model will provide the collaborative approach and certainty required for a program of this scale."

"The Gateway Hudson Tunnel will be a model of resilient infrastructure to futureproof safe and sustainable travel along the nation's most economically vital corridor. Arcadis is proud to bring our extensive tunneling, rail, and transit expertise to support the Gateway Development Commission to facilitate the urgent delivery of this megaproject that will improve quality of life for communities that live and work in New York, New Jersey, and beyond." said Greg Steele, Global President of Mobility at Arcadis.

The project includes construction of two, 4.5-mile-long tracks and tunneling, as well as repairing Amtrak's existing North River Tunnel, which opened in 1910 and was damaged during Hurricane Sandy in 2012.

MPA Delivery Partners is a joint venture between Mace, Parsons, and Arcadis. The delivery partner model has an internationally proven track record for helping public agencies deliver large-scale infrastructure projects.

Parsons, managing party in the joint venture, brings rail and transit experts who have been connecting communities in New York and New Jersey for nearly 80 years and have paved the way for numerous rapid transit projects with a proven track record of quality and experience around the United States.
