

Parsons Corporation Launches BlueFly™

July 21, 2025

A Game-Changing Search and Rescue Tool Revolutionizing Emergency Response Operations

CHANTILLY, Va., July 21, 2025 (GLOBE NEWSWIRE) -- Parsons Corporation (NYSE:PSN), a leader in technology-driven solutions, is proud to announce the development of BlueFly™, an innovative search and rescue sensor that enhances the capabilities of emergency response teams. Designed with state-of-the-art technology and affordability in mind, BlueFly™ aims to revolutionize how agencies conduct search and rescue missions in challenging and remote environments.

Developed by QRC®, a Parsons Company, the BlueFly™ platform leverages the latest advancements in Bluetooth low-energy detection to provide real-time situational awareness support for drone operator first responders. This comprehensive solution accelerates search operations and dramatically improves the probability of survival and outcomes.

"BlueFly™ exemplifies Parsons' commitment to empowering our first responders with the best tools available," said QRC® Vice President and General Manager Kate Jones. "In high-stakes situations, every second counts. BlueFly™ is engineered to detect Bluetooth Low Energy and Wi-Fi signals from common wearable electronics, such as smartwatches, wireless earbuds, fitness trackers, and medical monitoring devices like glucose monitors —allowing responders to rapidly locate missing individuals."

Weighing less than a pound and packing a detection range of up to 200 meters, BlueFly™ is designed to be drone-agnostic. Key features include enhanced data collection and analysis, large-area monitoring, and real-time data delivery to command centers.

For more information about BlueFly™ and to see how it can enhance your search and rescue operations, visit www.parsons.com/products/bluefly/.
