

## Parsons Corporation Launches Touchless, Biometric Sensing COVID Solution

May 4, 2020

### DetectWise™ will monitor real-time health and minimize disease spread

CENTREVILLE, Va., May 4, 2020 /PRNewswire/ -- As parts of the world prepare to reopen during the coronavirus (COVID-19) pandemic, society must reactivate while remaining committed to the health, safety and security of global citizens. With that in mind, Parsons Corporation (NYSE: PSN) has developed an integrated, touchless suite of solutions that will monitor real-time health and facilitate the safe movement of people in public areas.

The offering – known as DetectWise™ – includes contactless, mobile health screening kiosks, and modular testing and decontamination facilities to keep the public safe in high-traffic areas like airports, shopping malls, corporate buildings and sports stadiums. Contactless, mobile health screening systems will monitor the flow of movement and identify high-risk individuals so that steps can be taken to prevent them from mingling with the general population. Kiosks are being deployed across the nation within the next few weeks.

"The world of tomorrow looks far different than it did several weeks ago, and it's critical that companies like Parsons continue developing innovative technology that helps society return to a safe living and work environment as soon as possible," said Carey Smith, president and chief operating officer of Parsons. "DetectWise uses sensors and cameras to measure body temperature, heart rate and respiration rate that will help our customers better understand if an individual is symptomatic for the COVID-19 virus, allowing them to take steps necessary to minimize the risk of spreading the disease."

Modular facilities will be valuable as public life resumes and testing capabilities are needed outside of traditional healthcare settings. In conjunction with mobile health screening kiosks, testing facilities can help better evaluate issues affecting an individual's health and identify potential risks. The modular facilities will use Centers for Disease Control and Prevention (CDC) approved methods, in a simple, low-cost and rapidly deployable test lab that can be configured to meet the needs of any customer.

#### Forward Looking Safe Harbor Statement

*This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are based on our current expectations, beliefs and assumptions, and are not guarantees of future performance. Forward-looking statements are inherently subject to uncertainties, risks, changes in circumstances, trends and factors that are difficult to predict, many of which are outside of our control. Accordingly, actual performance, results and events may vary materially from those indicated in the forward-looking statements, and you should not rely on the forward-looking statements as predictions of future performance, results or events. Numerous factors could cause actual future performance, results and events to differ materially from those indicated in the forward-looking statements, including, among others: any issue that compromises our relationships with the U.S. federal government or its agencies or other state, local or foreign governments or agencies; any issues that damage our professional reputation; changes in governmental priorities that shift expenditures away from agencies or programs that we support; our dependence on long-term government contracts, which are subject to the government's budgetary approval process; the size of our addressable markets and the amount of government spending on private contractors; failure by us or our employees to obtain and maintain necessary security clearances or certifications; failure to comply with numerous laws and regulations; changes in government procurement, contract or other practices or the adoption by governments of new laws, rules, regulations and programs in a manner adverse to us; the termination or nonrenewal of our government contracts, particularly our contracts with the U.S. federal government; our ability to compete effectively in the competitive bidding process and delays, contract terminations or cancellations caused by competitors' protests of major contract awards received by us; our ability to generate revenue under certain of our contracts; any inability to attract, train or retain employees with the requisite skills, experience and security clearances; the loss of members of senior management or failure to develop new leaders; misconduct or other improper activities from our employees or subcontractors; our ability to realize the full value of our backlog and the timing of our receipt of revenue under contracts included in backlog; changes in the mix of our contracts and our ability to accurately estimate or otherwise recover expenses, time and resources for our contracts; changes in estimates used in recognizing revenue; internal system or service failures and security breaches; and inherent uncertainties and potential adverse developments in legal proceedings, including litigation, audits, reviews and investigations, which may result in materially adverse judgments, settlements or other unfavorable outcomes. These factors are not exhaustive and additional factors could adversely affect our business and financial performance. For a discussion of additional factors that could materially adversely affect our business and financial performance, see the factors included under the caption "Risk Factors" in our [Registration Statement on Form S-11] and our other filings with the Securities and Exchange Commission. All forward-looking statements are based on currently available information and speak only as of the date on which they are made. We assume no obligation to update any forward-looking statement made in this presentation that becomes untrue because of subsequent events, new information or otherwise, except to the extent we are required to do so in connection with our ongoing requirements under federal securities laws.*
