"2024 was another exceptional year for Parsons. We achieved record results for total revenue, adjusted EBITDA, adjusted EBITDA margin, operating cash flow, contract win rates, and contract awards. We are delivering consistent results as we reported double-digit organic revenue growth every quarter for the last two years," said Carey Smith, chair, president, and chief executive officer. Our balanced portfolio and our team's strong execution in our six large and growing end-markets is enabling us to take advantage of unprecedented global infrastructure spending and a purpose-built federal portfolio ready to counter near peer threats. As a Company serving both commercial and government customers, we understand the imperative to move with speed and agility to expeditiously solve our customers' most pressing and complex challenges. Looking forward, I am very excited about our prospects and ability to continue to deliver mid- single-digit or better organic revenue growth. Non-GAAP Financial Information

The tables under "Parsons Corporation Inc. Reconciliation of Non-GAAP Measures" present Adjusted Net Income attributable to Parsons Corporation, Adjusted Earnings per Share, Earnings before Interest, Taxes, Depreciation, and Amortization ("EBITDA"), Adjusted EBITDA, EBITDA Margin, and Adjusted EBITDA Margin, reconciled to their most directly comparable GAAP measure. These financial measures are calculated and presented on the basis of methodologies other than in accordance with U.S. generally accepted accounting principles ("Non-GAAP Measures"). Parsons has provided these Non-GAAP Measures to adjust for, among other things, the impact of amortization expenses related to our acquisitions, costs associated with a loss or gain on the disposal or sale of property, plant and equipment, restructuring and related expenses, costs associated with mergers and acquisitions, software implementation costs, legal and settlement costs, and other costs considered non-operational in nature. These items have been Adjusted because they are not considered core to the company's business or otherwise not considered operational or because these charges are non-cash or non-recurring. The company presents these Non-GAAP Measures because management believes that they are meaningful to understanding Parsons's performance during the periods presented and the company's ongoing business. Non-GAAP Measures are not prepared in accordance with GAAP and therefore are not necessarily comparable to similarly titled metrics or the financial results of other companies. These Non-GAAP Measures should be considered a supplement to, not a substitute for, or superior to, the corresponding financial measures calculated in accordance with GAAP.

¹ Book-to-Bill ratio is calculated as total contract awards divided by total revenue for the period.

¹ Presents the revised consolidated statement of operations resulting from the adoption of Accounting Standards Update ("ASU") 2024-04 as of January 1, 2024 on a prospective basis. As a result of the adoption of ASU 2024-04, the Company reversed a loss on extinguishment of debt for the partial repurchase of the Convertible Senior Notes due 2025 and recorded the repurchase transaction as an induced conversion. This change from extinguishment to inducement accounting resulted in the Company (i.) reversing the \$211.0 million loss and the related \$49.9 million tax benefit on extinguishment of debt, recorded in Q1 2024, (ii.) recording a \$18.4 million convertible debt repurchase loss, (iii.) the difference between the extinguishment loss and inducement expense of \$192.6 million recorded to equity, and (iv.) the related tax benefit of \$45.6 million recorded to equity. See "Note 2—Summary of Significant Accounting Policies—New Accounting Pronouncements" of the Company's Form 10-K for the year ended December 31, 2024 for a further discussion of the first quarter 2024 extinguishment accounting and subsequent change to inducement accounting.

² Diluted earnings per share prior to the adoption of ASU 2024-04 did not include certain adjustments as their inclusion would have been antidilutive. Subsequent to the adoption of ASU 2024-04 these adjustments are no longer antidilutive. Dilutive adjustments include if converted interest of \$2.8 million, 1.5 million shares related to stock based awards and 6.8 million shares related to convertible senior notes. Inclusion of these dilution adjustments resulted in dilutive net income attributable to Parsons Corporation of \$42.5 million and total diluted shares of 114.4 million for the quarter ended March 31, 2024.

No other quarters were impacted by the adoption of ASU 2024-04.
